

### **Volume I, 1984**

1. The clinician's guide to the theory and practice of NMR spectroscopy, by R. Edelman, Harvard Medical School, Boston.
2. Report of the First FESN Study Group on "Developmental Neurobiology and Nervous System Repair" edited by P.J. Magistretti, J.H. Morrison and F.E. Bloom
3. Receptor transduction mechanisms, by E. Helmreich, Physiologisch-Chemisches Institut der Universität, Würzburg.

### **Volume II, 1985**

1. PET scanning: principles and applications, by John C. Mazziotta, UCLA, Los Angeles
2. Report of the Second FESN Study Group on "Brain Metabolism and Imaging" edited by W. Feindel, R.S.J. Frackowiak, D. Gadian, P.L. Magistretti and M.R. Zaitsevsky
3. Factors promoting the growth of the nervous system, by Silvio Varon, UCSD, La Jolla
4. The neurobiology and pathophysiology of sleep and dreaming, by J.A. Hobson, Department of Psychiatry, Harvard Medical School, Boston.

### **Volume III, 1986**

1. Report of the Third FESN Study Group on "Molecular Mechanisms of Pathogenesis of Central Nervous System Disorders", edited by A. Bignami, L. Bolis and D.C. Gajdusek
2. How do we listen to neurons? by Q.J. Pittman, University of Calgary
3. Report of the Fourth FESN Study Group on "Transduction of Neuronal Signals" edited by P.J. Magistretti, J.H. Morrison and T.D. Reisine
4. MPTP: A new tool to understand Parkinson's disease, by S.P. Markey, NIH, Bethesda.

### **Volume IV, 1987**

1. Ion channels in neural membranes, by J.M. Ritchie, Yale University, New Haven
2. Cerebral dominance: biological associations and pathology, by A.M. Galaburda and M. Habib.
3. Report of the Fifth FESN Study Group on "Sensory Transduction" edited by A.J. Hudspeth, P.R. MacLeish, F.L. Margolis and T.N. Wiesel.
4. Cognitive and neurologic aspects of hemispheric disconnection in the human brain, by M.S. Gazzaniga, Cornell University, New York.

### **Volume V, 1988**

1. Behavioral approach to the study of the rat brain, by J.M. van Ree and D. de Wied, University of Utrecht.
2. Molecular neurobiological strategies applied to the nervous system, by R.J. Milner and J.G. Sutcliffe, Scripps Clinic, La Jolla.
3. Report of the Sixth FESN Study Group on "Molecular Genetic Mechanisms in Neurological Disorders", edited by P. Brown, L. Bolis and D.C. Gajdusek.
4. Grafting in the mammalian central nervous system: Basic science with clinical promise, by L. Olson, Karolinska Institute, Stockholm.

### **Volume VI, 1989**

1. The molecular biology of neuropeptides, by T.G. Sherman, H. Akil and S.J. Watson, University of Michigan, Ann Arbor
2. Colour vision and functional specialisation in the visual cortex, by S. Zeki, University College, London
3. Report of the Seventh FESN Study Group + on "Learning and Memory", edited by
4. L.R. Squire, M. Mishkin and A. Shimamura

**Volume VII, 1990**

1. Magnetic resonance imaging of the nervous system, by R. Edelman, Harvard Medical School, Boston
2. Report of the Eighth FESN Study Group + on "Neural Development", edited by T. Wiesel, D. Anderson and L. Katz
3. Proto-oncogene expression in the nervous system, J.I. Morgan, Roche Institute of Molecular Biology, Nutley

**Volume VIII, 1991/2**

1. Glial cells in the central nervous system, by A. Bignami, Harvard Medical School, Boston
2. Report of the Ninth FESN Study Group + on 'Circadian Rhythms' edited by M. Zatz
3. Molecular biology of neurotransmitter receptors, by T. Reisine, University of Pennsylvania School of Medicine, Philadelphia

**Volume IX, 1992/3**

1. Neurogenetics of Drosophila, by A. Ferrús, Cajal Institute, Madrid
2. The Organization of the Cerebral Cortex: From Molecules to Circuits, by J.H. Morrison and P.R. Hof, Mount Sinai Medical School, New York
3. Report of the Tenth FESN Study Group + on "Neural Immune Interaction"
4. edited by Floyd E. Bloom, Iain Campbell and Lennart Mucke

**Volume X, 1994/5**

1. Report of the Eleventh FESN Study + Group on "Evolution and Neurology of Language" edited by D.C. Gajdusek, C.L. Bolis and G.M. McKhann
2. Transgenic and ES Cell Chimeric Mice + as Tools for the Study of the Nervous System by K. Herrup, Case Western Reserve University, Cleveland
